

Cement Blanket (5mm-12mm)

TerraShield Cement blanket is a unique proprietary material with three dimensional structure. It has a very wide range of applications throughout the building & civil engineering industry. Cement blanket is a soft cloth impregnated with special cement. It has a design life of above 50 years and is significantly quicker and less expensive to install compared to conventional concrete.

Applications

-  Slope Protection
-  Ditch Lining
-  River, Lake, Ponds & Wet Lands
-  Tunnel
-  Roads & Highways Protection

Features

- A. Environmentally Friendly
- B. Low Carbon & Safe
- C. Prevents Ingress
- D. Freeze-Thaw Resistant
- E. No specialist required
- F. No cased borehole allowing ground preservation.
- G. Easy Loading & Usage
- H. Rapid Installation & Time Saving
- I. Lower project cost
- J. High Strength & Long life

Available in thickness – 5mm to 12mm

- A. Ditch Lining
- B. Revetment Project
- C. Sewage treatment plant
- D. Cistern
- E. Bottom of water park lake
- F. Drainage ditch
- G. Oil storage protection
- H. Pipeline protection
- I. Temporary Road
- J. Mineral Washing Pool
- K. Large Culvert
- L. Highway & Slope Protection
- M. Tunnel | Shelter | Digestate Tank
